General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#)

	References to data from	n FERC Form 1 are indicated as: #.y.x (page, line, column)		
Note				
Letter				
А		and 283, as adjusted by any amounts in contra accounts idention to utilize amortization of tax credits against taxable income		or liabilities related to FASB 158 or 109. Balance of Account 255 is reduced by prior flow Account 281 is not allocated.
В	Identified in Form 1 as being only transn	ission related.		
С	Cash Working Capital assigned to transi in the Form 1.	nission is one-eighth of O&M (including A&G) allocated to trans	smission and Prepaymen	ts are the electric related prepayments booked to Account No. 165 and reported on Pages 110-111 line 57
D	Line 35 excludes all Regulatory Commis	sion Expenses itemized at 351.h, all advertising included in Ad	count 930.1 (except safet	ly, education or out-reach related advertising) and all EEI and EPRI dues and expenses.
	Line 36 reflects all Regulatory Commissi	on Expenses directly related to transmission service, RTO filing	gs, or transmission siting i	temized at 351.h.
E		way, property, gross receipts, and other assessments charged y are recovered elsewhere. Excludes other taxes associated w		s related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement ers that are charged to the lessee.
				te, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in veloped. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather
F	than book tax credits to Account No. 255	and reduce rate base, must reduce its income tax expense by	y the amount of the Amort	ized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) .
	Inputs Required:	FIT =	21.000%	
		SIT=	8.840%	(State Income Tax Rate or Composite SIT from Attach 2)
		p =	0.000%	(percent of federal income tax deductible for state purposes)
		ral Projections and True-Up Adjustments) the statutory income through June 30, and 5% from July 1 through December 31, s		rmula Rate shall reflect the weighted average rates actually in effect during the Rate Year. For example, if the led 181/365 and 184/365, respectively, for a non-leap year.

- Prior to issuing any debt, the cost of debt will be 1.75%. When third party debt is obtained, the cost of debt is determined using the methodology in Attachment 2.
- Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to be included in OATT ancillary services. For these purposes, generation step-up facilities, which are deemed to be included in OATT ancillary services.
- Н up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.
- Reserved
- ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC under FPA Section 205 or 206. Pursuant to the Commission-approved settlement in Docket No. ER15-2239, the base ROE applicable to the Suncrest and Estrella Projects shall not be subject to change until three years after the date on which both of the Suncrest and Estrella Projects are under the operational control of the CAISO.
  - The capital structure shown on lines 80-83 will be 50% equity and 50% debt until project is placed into service. After the project is placed in service, the capital structure on lines 80-83 will reflect the actual capital structure.
- Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. Company must submit a Section 205 filing to recover the cost of abandoned plant. Any such filing to recover the cost of an abandoned plant item shall be made no later than 730 days after the date that Company formally declares such plant item abandoned.
- The regulatory assets will accrue carrying costs equal to the weighted cost of capital on line 83 until the formula rate is effective and the resulting charges are assessed to customers.
- Any plant leased to others will be removed from Plant In Service and booked to Leased Plant, Account 104. Expenses charged to the lessee will be booked to Account No. 413 and the accumulated depreciation associated with the leased plant shall not be included above on lines 9-11
- Incentive returns are excluded from lines 5-65, but rather the incremental incentive return is calculated in Col K on Attach 4 and included on line 66.
- Excludes TRBAA expenses

Formula Rate - Non-Levelized

Excludes costs associated with Asset Retirement Obligations (ARO) absent a subsequent filing under FPA Section 205.

# Attachment 1 - Revenue Credit Workpaper Horizon West Transmission, LLC

Account 454 - Rent from Electric Property (Note 3)	Notes 1 & 3	
1 Rent from FERC Form No. 1	Note 3, line 11	-

Note 1: Add additional lines after line 7 if or additional projects
Note 2: Regulatory Assets, Abandoned Plant, authorized CWIP in rate base, and plant in-service shall be listed separately on lines 7 for each project

Note 3: No incentive may be included in the formula absent authorization from FERC

Project	Docket Number			

Note 4: The Discount in Column L is the reduction in revenue, if any, that the company agreed to, for instance, to be selected to build facilities as the result of a competitive process and equals the amount by which the

annual revenue requirement is reduced from the ceiling rate. A vortpaper will be provided to show the calculation of the discount.

Note 5: All OAM will be directly assigned to each project with plant in service based on the invoiced amount per project. The details supporting the OAM direct assignment will be provided in a workpaper and the totals shown in a Form No. 1 footnote to pages 320-323.

A&AG will be addited in proportion to the Transmission OAM for each them in line 57 (not including amountization of Regulatory Asset(s) booked to Account 566).

A&G will be allocated in proportion to the Transmission O&M for each item in Lines 7 (not including amortization of Regulatory Asserts) booked to Account 566).											
	A	В	C	D	E

Note 6:	Narrative step by step of how data is derived and calculated within this attachment and how Attachment	3 relates to this attachment

6:	Narrative step by step of how data is derived and of	alculated within this attachment and how Attachment 3 relates to this attachment:
	Step 1	Lines 1-6 are sourced from Appendix III, Attachment 3 or calculated as set forth on each line.
	Step 2	On lines 7, for each project (whether FERC authorized CWIP in rate base or plant in service), FERC authorized Abandoned Plant or FERC authorized Regulatory Asset, Input the data for Steps 3 to 7
	Step 3	On lines 7, Col A, input the name of the project
	Step 4	On lines 7, Col B, input the useful life for projects with plant in service based on the depreciation rates set forth in Attach 9, or the amortization period approved by FERC for Abandoned Plant or Regulatory Assets
	Step 5	Lines 7, Col C, is the increase in ROE authorized by FERC from Note 3
	Step 6	Lines 7, Col D, is the Base Fixed Charge Rate from line 5 which excludes any increased ROE authorized by FERC
	Step 7	Lines 7, Col E, calculate the Fixed Rate Charge for the line including the increased ROE authorized by FERC
	Step 8	On Lines 7, Col F, input the 13 month balance of each Investment (defined in Note 2 as Regulatory Assets, Abandoned Plant, authorized CWIP in rate base, and plant in-service). The total on line 8 must tie to line 4.
	Step 9	On Lines 7, Col G, input the depreciation or amortization expense associated with each investment and the total on line 8 must tie to the sum of Appendix III, lines 33b, 40 & 42, col 5
	Step 10	On Lines 7, Col H, input the O&M from Note 5, Col E for each project with plant in service.
	Step 11	Lines 7, Col I, calculates the revenue requirement at the Base FCR for each Investment as the sum of Cols D, F, G and H
	Step 12	Lines 7, Col J, calculates the revenue requirement for each Investment including any increased ROE authorized by FERC as the sum of Cols E, F, G and H
	Step 13	Lines 7, Col K, calculates the revenue related to any increased ROE authorized by FERC.
		On Lines 7, Col L, input the amount by which the transmission owner has committed to charge less than the rate in Col J, regardless of how that Discount is calculated. For each project, the amount of the Discount will be zero or a reduction to the annual transmission revenue requirement in one or more years. The transmission owner will include, as part of its Annual Update, (i) an explanation of the basis for any Discount, (ii) a calculation of the Discount, and (iii) any documentation needed to support the calculation of the Discount. The amount in Column 17 above equals the amount
	Step 14	by which the annual revenue requirement is reduced from the ceiling rate

Step 15 Lines 7, Col M, calculates the revenue requirement attributable to each project to be charged customers as Col J less Col L.

Attachment 3 calculates the increase in the Fixed Charge Rate attributable to an increase in ROE of 100 basis points. Lines 7, Col C inputs the actual increase in ROE authorized by FERC for the project. Lines 7, Col E compute the increase in the Fixed Charge Rate associated with the increased ROE authorized by FERC for each project. The combination of Attachment 3 and Lines 7, Cols C & E, allow the formula to calculate the proper Fixed Charge Rate for each project based on the actual ROE increase for each project authorized by FERC.

#### Attachment 5 - Example of True-Up Calculation

### Horizon West Transmission, LLC

<sup>1.</sup> The Revenue Requirement Billed is input, the source are the invoices from CAISO. The amounts do not include any true-ups, prior period adjustments, or TRBAA amounts

<sup>2.</sup> The Actual Revenue Requirement is input from Appendix III, line 1. The amounts do not include any true-ups, prior period adjustments, or TRBAA amounts

<sup>3.</sup> Then Monthly Interest Rate shall be equal to the interest rate set forth in the Protocols.

<sup>4.</sup> The True-Up Adjustment is applied to each project prorata based its contribution to the Revenue Requirement shown in Appendix III, line 1.

- 32 Instructions for Account 190:
- 33 1. ADIT items related only to Non-Electric Operations (e.g., Gas, Water, Sewer) or Production are directly assigned to Column C
- 34 2. ADIT items related only to Transmission are directly assigned to Column D
- 35 3. ADIT items related to Plant and not in Columns C & D are included in Column E
- 36 4. ADIT items related to labor and not in Columns C & D are included in Column F
- 5. Deferred income taxes arise when items are included in taxable income in different periods than they are included in rates, therefore if the item giving rise to the ADIT is not included in the formula, the associated ADIT amount shall be 37 excluded. This includes but is not limited to SFAS 109 & 158 balance sheet items and the related ADIT.

Note 1 Uses a 365 day calendar year.

Note 2 Projected end of year ADIT must be based on solely on enacted tax law. No assumptions for future estimated changes in tax law may be forecasted.

A Substantial portion, if not all, of the ADIT-282 balance is subject to proration. Explanation must be provided for any portion of balance not subject to proration.

B Only amounts in ADIT-283 relating to Depreciation, if applicable, are subject to proration. See Line 44 in Attach 6c and 6d.

C Only amounts in ADIT-190 related to NOL carryforwards, if applicable, are subject to proration. See Line 18 in Attach 6c and 6d.

Notes

(1) Horizon West must list ALL unfunded reserves on its books by subaccount, specifically including (but not limited to) all subaccounts for FERC Account Nos. 228.1 through 228.4. "Unfunded reserve" is defined as an accrued balance (1) created and increased by debiting an expense which is included in this formula rate; (2) in advance of an anticipated expenditure related to that expense; (3) that is not deposited in a restricted account (e.g., set aside in an escrow account) with the earnings thereon retained within that account. Where a given reserve is only partially funded through accruals collected from customers, only the balance funded by customer collections shall serve as a rate base credit and the input in Col (q) will be less than 1. Where the full reserve is deposited into a trust the input in Col (r) will be zero. Where only a portion of the reserve is deposited into a trust the input in Col (r) will be trust. The source of monthly balance data is company records.

		Transmission facility Contributions in Aid of Construction	Note 1

Note 1: In the event a Contribution in Aid of Construction (CIAC) is made for a transmission facility, the transmission depreciation rates above will be weighted based on the relative amount of underlying plant booked to the accounts shown in lines 1-10 above, and the resultant weighted average depreciation rate will be used to determine the life over which to amortize the CIAC. The life of each facility subject to a CIAC will be estimated in this manner at the time the plant is placed into service, and will not change over the life of the CIAC without FERC approval. The combined amortization expense for all CIACs shall be the sum of each individual CIAC balance amortized over the life of each individual CIAC established in this manner.

These depreciation rates will not change absent the appropriate filing at FERC.
